SUMMARY

- A professional and certified front-end web developer with strong knowledge of front-end web technologies like HTML, HTML5, CSS, CSS3, Bootstrap, Sass, Javascript, JQuery, and Chrome DevTools.
- Proficient in creating complex and beautiful looking fully responsive websites for all types of devices and browsers with the help of HTML, CSS - flexbox, grid, media-query, Bootstrap - grid system, Javascript, and JQuery. I have developed and deployed more than 15+ fully responsive websites
- Seeking a position in an organization where I can use my skills and create value and can grow professionally and individually. Available for interview ASAP (Virtual & Phone - Anytime || In-person 24 hours).

SKILLS

- HTML, HTML5, CSS, CSS3, Bootstrap, SASS, Javascript, JQuery, Devtools, Git, Github, and Photoshop.

WORK EXPERIENCE

- I have developed dozens of fully responsive beautiful & modern-looking websites. Have extensive knowledge of HTML, HTML5, CSS, CSS3, Sass, Bootstrap, Javascript, and JQuery.
- Proficient in developing website layout with a “mobile-first” approach.
- Efficient in building and writing code with best practices for Higher optimization, better SEO, easy accessibility, easily readable and maintainable with the HTML5 semantic tag, proper indentation and commenting.
- I can convert any HTML layout into an attractive and fully responsive website, with proper structure and alignment with the help of CSS flex-box, grid, position, 2D 3D animations, media query, and other styling properties.
- Proficient in developing Bootstrap fully responsive websites fast and efficiently with Bootstrap grid-system, utility classes, and pre-build components. I can customize Bootstrap very easily as per the requirements.

- With the help of SASS, I can develop a user interface fast, easily, and organized by partials, and always try to make code reusable by mixin, extends, and variables.
- Have deep knowledge of javascript core concepts including variable, data type, conditional expression, loops, function, DOM manipulation, BOM, events, and ES6+ concepts.
- With the help of Javascript, I can create many interactive UI functionality for better user experiences. And can also integrate many JS plugins for adding more functionality.
- With the help of JQuery, I can add a variety of UI components and functionalities like image galleries, carousels, etc. And can make the website more eye-catching and beautiful with easy DOM manipulation and animations.
- Efficient in source code management with the help of a version control system (git) and can easily collaborate with the team with the help of GitHub.
- Proficient in developing cross-browser web pages, and I can use browsers DevTools for debugging. I can debug the code and can fix problems. I can develop projects from scratch.
- Having sufficient knowledge of Photoshop, I can easily communicate with the UI designer to complete the projects easily.
